Moola Suryaprakash Reddy

has successfully completed the online, non-credit Specialization

Python for Everybody

This Specialization builds on the success of the Python for Everybody course and will introduce fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language. In the Capstone Project, you'll use the technologies learned throughout the Specialization to design and create your own applications for data retrieval, processing, and visualization.

PostgreSQL for Everybody

In this course series, learners gained skills to use the PostgreSQL database and explored topics ranging from database design to database architecture and deployment. Other focus areas included comparing and contrasting SQL and NoSQL approaches to database design. Projects focused on creating and manipulating tables, designing data models, constructing advanced queries, and techniques for working with text in databases, including regular expressions.

Exam Prep AZ-104: Microsoft Azure Administrator Associate

Congratulations! By successfully completing Exam Prep AZ-104: Microsoft Azure Administrator Associate, you have demonstrated your mastery of the fundamental principles of Azure administration and your ability to operate various Azure services necessary for building, deploying, and maintaining cloud solutions. This certification validates your expertise in designing, implementing, and managing Azure resources, including virtual machines, storage accounts, virtual networks, and Azure Active Directory. You have also shown your ability to handle identity and access management, monitoring and troubleshooting, and resource optimization in Azure. By earning this certification, you have positioned yourself as a skilled Azure administrator who can effectively manage and secure Azure environments,

Robotic Process Automation (RPA)

The Robotic Process Automation (RPA) specialization offers comprehensive knowledge and professional-level skills focused on developing and deploying software robots. It starts with the basic concepts of Robotic Process Automation. It builds on these concepts and introduces key RPA Design and Development strategies and methodologies specifically in the context of UiPath products. A student undergoing the course shall develop the competence to design and develop automation solutions for a defined process.

RPA Basics and Introduction to UiPath

Data Manipulation in RPA

UI Automation and Selectors

Control Flow in RPA

Automation Techniques in RPA

UiPath Orchestrator and Capstone Projects

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses.
